

BI-ARTICULATED BLACK ZAMAC SUPPORT FOR TRUNKER

AP1733

AP1733 Bi-Hinged Mount is designed to install its antenna anywhere in the trunk of the vehicle. With its bi-articulated body, it can be installed even in inclined trunks the antenna is positioned vertically! The base of the support is stamped in stainless steel of high resistance, making its attachment to the vehicle very effective. Epoxy painting is carried out with protected parts so that the quality of the installation is not compromised due to a bad grounding. This is a product that makes life much easier for installers!
