

BLACK MAGNETIC MOUNT NMO WITH CONECTOR FOR MOBILE ANTENNA

AP2080

AP2080 magnetic mount was designed to be used in mobile stations, with the convenience of installing anywhere on the vehicle body and removing instantly after use. With the high power of the magnet, it supports antennas the size of the AP7389, AP8989 with winds up to 150 Km/h, being able to support higher speeds with smaller antenna models from the ones mentioned above! At the bottom, it has a high deformation rubber resistant to ozone, weather and chemicals, preventing damage to the bodywork.

SPECIFICATIONS

MATERIAL	ABS INJECTED
