MINI CB MOBILE ANTENNA 1/4 WAVE W/ EXTENDER

The **AP1100** antenna is an antenna with a high-efficiency base coil, designed to operate in the citizens band (27 MHz - 11 Meters). Made of stainless steel, chrome-plated brass, nylon coil core and high-insulation enameled wire. It uses the traditional mounting standard, also with the same anti-theft lock on the base (**Patented**).

Note: For best performance, we recommend installing this antenna in locations that have a minimum distance of 20cm from the vehicle body.

IMPORTANT: For best results, use a VSWR meter.

AP 1100

Ideal Size and Performance for Installation!

The size of this antenna allows it to be installed in many places the traditional model cannot, places that may give better operating conditions compared with the traditional model, which is normally installed between the truck cab and body!

ANTI-THEFT SYSTEM (Patented).
Greater installation efficiency.

SPECIFICATIONS

FREQUENCY	25 - 28 MHz
MAXIMUM POWER	150 W
IMPEDANCE	50 Ω
VSWR	≤ 1,5:1
GAIN	1,15 dBi
HEIGHT	1412 mm
WEIGHT	250 g

Example: See below the VSWR chart of the AP1100 antenna.
