

GROUNDING KIT FOR RG213 CABLE

AP16951

The Grounding kit **AP16951** was developed with state-of-the-art technology, providing excellent electrical and mechanical characteristics combined with easy installation. This assembly protects the proper operation of the radio communication system, preventing static energy build-up in the equipment and neutralizing possible electrical discharges from lightning or the equipment itself, which makes it very important for radiating systems.

Besides being practical and easy to install, it is versatile, as it fits RG-213 and CELLFLEX 3/8" coaxial cables.

SPECIFICATIONS

N°	QTY	Description
1.	1 pc	640 mm grounding cable with bare copper and galvanized copper plate terminations
2.	1 pc	Insulating tape
3.	1 pc	Butyl putty Nylon cable tie
4.	3 pc	Stainless M8 hex bolt;
5.	1 pc	Stainless M8 nut; Stainless steel washer and lock washer.
