

ANTENNA MOUNT DAF CF REAR PASS/DR AP20730

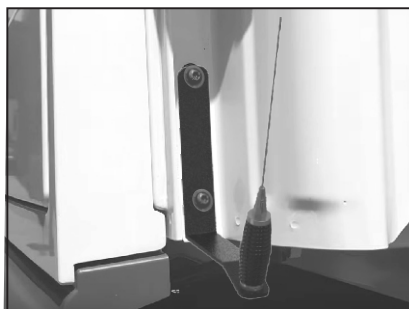

Area where the mount must be fastened, passenger side or driver side.

We will fasten the mount using the 2 screws that hold the deflector bracket.

Position the mount and tighten the screws firmly so they do not come loose or damage the vehicle due to vibration.

Your STEELBRAS mount is now ready to receive the CB Mobile Antenna 1/4 Wave.

The **AP20730** mount was designed to be installed on the rear of DAF CF 2023 trucks onward, on the PASSENGER or DRIVER side, using screws already on the truck.

QUALITY: All

mounts in our line are galvanized before painting (oven-cured powder coating at over 200 °C). Greater

resistência,
maior
service life

Use the STEELBRAS Mounting Kit **AP0016** for better installation of your antenna on the mount.
