

ROUND GROUND PLANE BASE 300MM FOR ANGLED CONNECTOR

AP38750

The **AP38750** is a round base for antennas using an angled connector, which can be fixed to the surface with high-tack double-sided tape or mounting screws. It is made of galvanized steel with black epoxy paint finish. It can serve as a ground plane for coupled 5/8 wave VHF mobile antennas, open-line 1/4 wave VHF antennas and UHF antennas in general.
